DETAILED ACTION

Claim Objections

Claims 6-8 and 10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Everhart '387 (note especially Figures 1, 2 & 4-7 and column 2, lines 10-33).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3673

Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Everhart '387. Everhart '387 discloses the claimed invention except for the height, width, depth and thickness dimensions as claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the device of Everhart '387 from Applicant's claimed dimensions, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spector et al. '417, Spector et al. '912, Albecker, III '647, Albecker '653, Goldado '796, Albecker, III '567, Radford '582, Radford '721 and Radford '471.
